---

## EDUCATION

Jamia Millia Islamia, New Delhi

Diploma in Computer Engineering

2023 – 2026

---

## TECHNICAL SKILLS

Programming Languages:

C, C++, Java, Python, MySQL

Libraries / Tools:

OpenCV, Git, AI Tools

Core Concepts:

Data Structures, Algorithms, Problem Solving, Basic Computer Vision

---

## PROJECTS

Virtual Pen using OpenCV

Technologies: Python, OpenCV, ChatGPT

- Developed a computer vision based virtual pen that allows users to draw on screen using hand movement detected through a webcam.
- Implemented color detection and object tracking using OpenCV.
- Enabled real-time drawing on the laptop screen using camera input.

Student Registration System (Login & Signup)

Technologies: HTML, MySQL, Backend Logic

- Built a working student authentication system with signup and login functionality.
- Implemented database storage and retrieval for user credentials.
- Demonstrated basic backend logic and data handling.

Expression Evaluation System

Technologies: C++, Data Structures

- Implemented parenthesis validation, infix to postfix conversion, and postfix expression evaluation.
  - Applied stack-based algorithms for expression parsing and evaluation.
  - Focused on algorithmic problem solving and expression handling techniques.
- 

## CERTIFICATIONS & WORKSHOPS

Deloitte Technology Virtual Experience Program – Forage

Deloitte Data Analytics Virtual Experience Program – Forage

Deloitte Cybersecurity Virtual Experience Program – Forage

AI Tools & ChatGPT Workshop – BE10x

Ethical Hacking & Cybersecurity Workshop – VaultofCodes

---

## ADDITIONAL INFORMATION

- Actively practicing algorithmic problem solving on LeetCode.
- Currently solving coding problems daily to improve data structure and algorithm skills.
- Interested in Software Development, Artificial Intelligence, and Cybersecurity.
